Dear Ms. Hall,

Please find attached the stacktesting reports on Honeywell Hopewell's SCR installation on C-train in Area 9. These are required by Conditions 17 and 20 of the Consent Decree dated July 18, 2013. When I emailed them to John Reinhardt on Friday, I inadvertently left you off the mailing list. We will Fedex the hardcopies of the reports to you when we receive them.

If you have any concerns or questions, please contact me.

John, please see the attached final reports for the TW-17 and TW-18 performance tests on NOx destruction efficiency and RATA. As you can see, all of the tests passed, and the NOx destruction efficiency for both towers was over 98%. The hardcopy reports are enroute to us, and we will mail them to you when received.

We are reviewing the particulate testing reports on TW-17 and TW-18 and will have those reports to you soon as well. If you have any questions or concerns, please let me know.
